Thanks muchly.

Do you happen to have the appendices file on disc? Martin Kessler will need it to slice/dice and post to the web, similar to the last round of data/appendices that he posted for WL in July. We can work with the report document just fine from the H: drive, but the appendices document is too big to move around for purposes of posting on the web. So if you've got it on disc, please let me know and I'll come pick it up or you can come drop it off at my cube or Martin's cube next door.

We will be all set to post the report document live on the EPA R7 West Lake web page on Monday at 10 a.m., but it may take some additional time to get the appendices all lined out for posting there—which is acceptable under these circumstances.

Let me know if you have any questions.

Thanks,

Chris

Located in West Lake Schedule Tracker \ New Groundwater Sampling Data 2013-2013 \ July 2013. Per our discussion with Karl this afternoon, these will be posted to our website early next week.
